

# Relational Junction for Oracle

Relational Junction is Oracle Cloud certified and is recognized by Oracle as a ground-breaking solution that supports critical data management and analytics use cases.

## Maximize the Power of Oracle Cloud

Sesame Software's data management platform, Relational Junction, integrates with Oracle Cloud in just minutes. Relational Junction enables you to replicate and integrate your business data with Oracle Applications, as well as other data sources.

### Instant Data Warehouse

- ✓ Instant reporting data warehouse for Oracle Applications and a wide variety of data sources
- ✓ Rapid data ingestion to your data warehouse, lake, or lakehouse for data mining and analytics
- ✓ Fully automated data syncs - no coding, data mapping, or data warehouse maintenance required

### Rapid Data Integration

- ✓ Easily integrate and replicate data to the destination of your choice - Oracle ADW, ADB, ATP, and many other data warehouses and databases
- ✓ High-volume data pipelines quickly connect on-premise / cloud data sources and applications

## Fast Application Migration

- ✓ Quickly migrate applications, databases, and complex workloads to Oracle Cloud or the cloud infrastructure of choice with no down-time
- ✓ Seamlessly move from one database to another, on-premise to cloud, or cloud to cloud

## Accelerated Insights

- ✓ Eliminate data silos and gain a complete view of your critical business data across your entire organization to drive actionable insights
- ✓ Enable business analysts, data scientists, and machine learning engineers to leverage application data to build predictive models of nearly every facet of your business

## Key Benefits

 <p>High-volume data connectors enable rapid connection to Oracle Applications and other data sources</p>	 <p>Patented multi-threaded technology ensures the fastest possible data movement</p>
 <p>Replicates data to a fully automated data warehouse for backup, compliance, and business intelligence</p>	 <p>Lowers total cost of ownership by eliminating data modeling, database design, and data mapping - just click and load</p>
 <p>Enables intelligent automation, with high-volume data processing in near real-time</p>	 <p>Rapid deployment shortens your time to production - get data moving in minutes, not months!</p>

## About Sesame Software

Sesame Software is the Enterprise Data Management leader, delivering data rapidly for enhanced reporting and analytics. Sesame Software's data platform combines data warehousing, integration, replication, and backup capabilities to fit your business needs. Quickly connect to SaaS, on-premise, and cloud applications for accelerated insights. Learn more today!
